

Online Examination Report

Date:	23.07.2014
Attempts:	1
Examinee:	Othieno, Leonard
Date of birth:	10/22/1985
Subject:	040-Human performance
Result:	67,5 %
Time used:	00:30:00 (HH:MM:SS)

Attachments

1. List of result by question
2. List of result by topic
3. Detailed question result report

Attachment 1: List of result by question

CQB Number	Internal Number	Syllabus reference	Chapter	Points	Max. Points
1	165	40.	HUMAN PERFORMANCE	1,00	1,00
2	193	40.	HUMAN PERFORMANCE	1,00	1,00
3	161	40.	HUMAN PERFORMANCE	1,00	1,00
4	195	40.	HUMAN PERFORMANCE	1,00	1,00
5	196	40.	HUMAN PERFORMANCE	0,00	1,00
6	168	40.	HUMAN PERFORMANCE	1,00	1,00
7	194	40.	HUMAN PERFORMANCE	1,00	1,00
8	171	40.	HUMAN PERFORMANCE	1,00	1,00
9	197	40.	HUMAN PERFORMANCE	0,00	1,00
10	178	40.	HUMAN PERFORMANCE	1,00	1,00
11	130	40.	HUMAN PERFORMANCE	1,00	1,00
12	105	40.2	Basic aviation physiology and health maintenance	1,00	1,00
13	103	40.2	Basic aviation physiology and health maintenance	0,00	1,00
14	68	40.2.1.1	The atmosphere	1,00	1,00
15	55	40.2.1.1	The atmosphere	1,00	1,00
16	34	40.2.1.2	Respiratory and circulatory systems	1,00	1,00
17	60	40.2.1.2	Respiratory and circulatory systems	1,00	1,00
18	61	40.2.1.2	Respiratory and circulatory systems	1,00	1,00
19	13	40.2.2.2	Vision	0,00	1,00
20	6	40.2.2.2	Vision	1,00	1,00
21	86	40.2.2.2	Vision	1,00	1,00
22	62	40.2.2.3	Hearing	1,00	1,00
23	85	40.2.2.5	Integration of sensory inputs	1,00	1,00
24	107	40.2.3	Health and hygiene	1,00	1,00
25	35	40.2.3.2	Body rythm and sleep	0,00	1,00
26	66	40.2.3.3	Problem areas for pilots	1,00	1,00
27	28	40.2.3.3	Problem areas for pilots	0,00	1,00
28	72	40.2.3.4	Intoxication	0,00	1,00

CQB Number	Internal Number	Syllabus reference	Chapter	Points	Max. Points
29	2	40.3	BASIC AVIATION PSYCHOLOGY	1,00	1,00
30	122	40.3	BASIC AVIATION PSYCHOLOGY	0,00	1,00
31	152	40.3	BASIC AVIATION PSYCHOLOGY	1,00	1,00
32	124	40.3	BASIC AVIATION PSYCHOLOGY	1,00	1,00
33	69	40.3.1.3	Memory	0,00	1,00
34	65	40.3.1.4	Response selection	1,00	1,00
35	29	40.3.2.3	Theory and model of human error	0,00	1,00
36	110	40.3.3	Decision making	1,00	1,00
37	119	40.3.5	Human behaviour	1,00	1,00
38	113	40.3.5	Human behaviour	0,00	1,00
39	116	40.3.5	Human behaviour	0,00	1,00
40	82	40.3.5.1	Personality, attitude and behaviour	0,00	1,00
Total:68%				27,00	40,00

Attachment 2: List of result by topic

Licence

Date: 23.07.2014

Examinee: Othieno, Leonard

Location: Uganda Civil Aviation Authority

Your Result: 27,00 from 40,00 Points (67,50 %)

Topics	Ammount of Questions	Points achieved	Maximum Points	Percent
40. HUMAN PERFORMANCE	40	27,00	40,00	67,50
40.2. Basic aviation physiology and health maintenance	17	12,00	17,00	70,59
40.3. BASIC AVIATION PSYCHOLOGY	12	6,00	12,00	50,00
Total	40	27,00	40,00	67,50

1

A person should be able to overcome the symptoms of hyperventilation by

- ☒ **slowing the breathing rate**
- ☐ **increasing the breathing rate**
- ☐ **refraining from the use of alcohol**

2

Due to visual illusion, when landing on a narrower-than-usual runway, the aircraft will appear to be

- ☒ higher than actual, leading to a lower-than-normal approach.
- ☐ higher than actual, leading to a higher-than-normal approach.
- ☐ lower than actual, leading to a higher-than-normal approach.

3

which of the following may more likely result into hypoxia?

- ☒ reduced barometric pressures at altitude.
- ☐ decreasing amount of oxygen as your altitude increases.
- ☐ excessive nitrogen in the bloodstream.

4

Abrupt head movement during a prolonged constant rate turn in IMC or simulated instrument conditions can cause

☒ **pilot disorientation.**

☐ **elevator illusion.**

☐ **false horizon.**

5

A sloping cloud formation, an obscured horizon, and a dark scene spread with ground lights and stars can create an illusion known as

- ☒ autokinesis.
- ☐ elevator illusions.
- ☐ false horizons.

6

What suggestion could you make to people who are experiencing motion sickness?

- ☒ **Avoid unnecessary head movement and focus sight on a point outside the aircraft.**
- ☐ **Have the students lower their head, shut their eyes, and take deep breaths.**
- ☐ **Recommend taking medication to prevent motion sickness.**

7

What visual illusion creates the same effect as a narrower-than-usual runway?

- ☐ A downsloping runway.
- ☐ A wider-than-usual runway.
- ☒ An upsloping runway.

8

During training flights, an instructor should interject realistic distractions to determine if a student can

- ☒ **maintain aircraft control while his/her attention is diverted.**
- ☐ **perform maneuvers using the integrated method of flight instruction.**
- ☐ **learn despite stressful conditions.**

9

An abrupt change from climb to straight-and-level flight can create the illusion of

- ☐ a noseup attitude.
- ☒ a descent with the wings level.
- ☐ tumbling backwards.

10

Name some hazardous attitudes that can affect your judgment during the aeronautical decision making (ADM) process.

- ☒ **Antiauthority, impulsivity, and resignation.**
- ☐ **Peer pressure and stress levels.**
- ☐ **Impulsivity, antiestablishment, and reevaluation.**

11

Which of the following is the first step of the Decide Model for effective risk management and Aeronautical Decision Making?

☒ Detect.

☐ Evaluate.

☐ Identify.

12

which of these conditions results in hypoxia?

- ☒ Insufficient oxygen reaching the brain.
- ☐ Excessive oxygen in the bloodstream.
- ☐ Excessive carbon dioxide in the bloodstream.

13

Which of these is a common symptom of hyperventilation?

- ☒ A sense of well-being.
- ☐ Decreased breathing rate.
- ☐ Drowsiness.

14

Fatigue and stress

- ☐ do not affect hypoxia at all
- ☐ increase the tolerance to hypoxia
- ☒ lower the tolerance to hypoxia
- ☐ will increase the tolerance to hypoxia when flying below 15 000 feet

15

Air at an altitude of 18.000 feet contains, approximately:

- ☐ 5% oxygen
- ☐ 10% oxygen
- ☒ 21% oxygen
- ☐ 15% oxygen

16

Symptoms of decompression sickness

- ☐ are flatulence and pain in the middle ear
- ☒ are bends, chokes, creeps and neurological symptoms
- ☐ can only develop at altitudes of more than 40000 FT
- ☐ are only relevant when diving

17

The following actions are appropriate when faced with symptoms of decompression sickness:

1. climb to higher level
2. descent to the higher of 10000 ft or MSA and land as soon as possible
3. breathe 100 % oxygen
4. obtain medical advice about recompression after landing

☐ 1, 2 and 3 are correct

☐ 1 and 3 are correct

☐ 1 and 4 are correct

☒ 2, 3 and 4 are correct

18

Flying immediately after SCUBA diving involves the risk of getting:

☐ **stress**

☒ **decompression sickness**

☐ **hypoxia**

☐ **hyperventilation**

19

When focussing on near objects:

- ☐ the shape of lens gets flatter
- ☒ the pupil gets larger
- ☐ the shape of lens gets more spherical
- ☐ the cornea gets smaller

20

During poor weather conditions a pilot should fly with reference to instruments because:

- ☐ pressure differences can cause the altimeter to give wrong information
- ☒ perception of distance and speed is difficult in an environment of low contrast
- ☐ the danger of a "greying out" will make it impossible to determine the height above the terrain
- ☐ his attention will be distracted automatically under these conditions

21

The retina of the eye

- ☐ only regulates the light that falls into the eye
- ☒ is the light-sensitive inner lining of the eye containing the photoreceptors essential for vision
- ☐ is the muscle, changing the size of the crystalline lens
- ☐ filters the UV-light

22

Which part of the inner ear is responsible for the perception of sound?

- ☐ The semicircular canals
- ☐ The Eustachian tube
- ☐ The sacculus and utriculus
- ☒ The cochlea

23

"Pilot's vertigo"

- ☒ is the condition of dizziness and/or tumbling sensation caused by contradictory impulses to the central nervous system (CNS)
- ☐ is the sensation of climbing caused by a strong linear acceleration
- ☐ announces the beginning of airsickness
- ☐ is the sensation to keep a rotation after completing a turn

24

Which of these is true regarding the presence of alcohol within the human body?

- ☐ An increase in altitude decreases the adverse effect of alcohol.
- ☒ Judgment and decision-making abilities can be adversely affected by even small amounts of alcohol.
- ☐ A small amount of alcohol increases vision acuity.

25

The physiological rhythms of a pilot in a new time zone will resynchronise to this new time zone at a rate of about

- ☐ 2 - 2.5 hours a day
- ☐ 4 - 4.5 hours a day
- ☐ 1 - 1.5 hours a day
- ☒ 3 - 3.5 hours a day

26

Loss of elasticity of the crystalline lens due to ageing occurs in:

☐ myopia

☐ astigmatism

☒ presbyopia

☐ hypermetropia

27

Which of the following statements about hyperthermia is correct ?

- ☒ Vasodilatation is the only mechanism which is capable of reducing body temperature.
- ☐ Performance is not impaired by an increase in body temperature to 40°C or more.
- ☐ Evaporation is more effective when ambient humidity is high.
- ☐ Complete adaptation to the heat in a hot country takes about a fortnight.

28

Alcohol degrades:

- ☒ **Slow wave sleep**
- ☐ **Stage 3 and 4 sleep**
- ☐ **Stage 2 sleep**
- ☐ **Paradoxical sleep**

29

What are two types of attention ?

- ☒ Selective and divided
- ☐ Divided and behavioural
- ☐ Cognitive and intuitive
- ☐ Intuitive and behavioural

30

What does good cockpit stress management begin with?

- ☒ Knowing what causes stress.
- ☐ Good life stress management.
- ☐ Eliminating life and cockpit stress issues.

31

To communicate effectively, instructors must

- ☐ display an authoritarian attitude.
- ☒ display a positive, confident attitude.
- ☐ utilize highly organized notes.

32

While conducting an operational check of the cabin pressurization system, the pilot discovers that the rate control feature is inoperative. He knows that he can manually control the cabin pressure, so he elects to disregard the discrepancy. Which of the following alternatives best illustrates the INVULNERABILITY reaction?

- ☒ What is the worst that could happen.
- ☐ It's too late to fix it now.
- ☐ He can handle a little problem like this.

33

Which of the following is true with reference to semantic memory?

- ☐ It is the meaning of words and general knowledge of the world; it lasts for a shorter period of time than episodic memory and tends to be less accurate.
- ☐ It is the memory of events; it lasts for a longer period of time than episodic memory and tends to be more accurate.
- ☐ It is the meaning of words and general knowledge of the world; it lasts for a longer period of time and tends to be more accurate than episodic memory.
- ☒ It is the memory of events; it lasts for a shorter period of time than episodic memory and tends to be less accurate.

34

The ability to monitor information which could indicate the development of a critical situation

- ☒ **is necessary to maintain good situational awareness**
- ☐ **makes no sense because the human information processing system is limited anyway**
- ☐ **is responsible for the development of inadequate mental models of the real world**
- ☐ **is dangerous, because it distracts attention from flying the aircraft**

35

What is the current approach to human error?

- ☒ Realisation that humans are fallible and that systems and procedures should be brought into line to prevent system, latent and procedural errors.
- ☐ Realisation that humans are fallible and that systems and procedures should be designed to minimise human error.
- ☐ Realisation that humans are infallible and that systems/procedures should be designed to minimise human error.
- ☐ Realisation that humans are infallible and that systems and procedures should be brought into line to prevent system/procedural errors.

36

Define Aeronautical Decision Making(ADM)

- ☐ decision making process which relies on good judgment to reduce risks associated with each flight.
- ☒ systematic approach to the mental process used by pilots to consistently determine the best course of action for a given set of circumstances.
- ☐ mental process of analyzing all information in a particular situation and making a timely decision on what action to take.

37

What is the first step in neutralizing a hazardous attitude in the ADM process?

- ☐ Dealing with improper judgment.
- ☒ Recognition of hazardous thoughts.
- ☐ Recognition of invulnerability in the situation.

38

The basic drive for a pilot to demonstrate the 'right stuff' can have an adverse effect on safety, by

- ☐ imposing a realistic assessment of piloting skills under stressful conditions.
- ☐ generating tendencies that lead to practices that are dangerous, often illegal, and may lead to a mishap.
- ☒ a total disregard for any alternative course of action.

39

Hazardous attitudes which contribute to poor pilot judgment can be effectively counteracted by

- ☐ redirecting that hazardous attitude so that appropriate action can be taken.
- ☐ taking meaningful steps to be more assertive with attitudes.
- ☒ early recognition of hazardous thoughts.

40

Personality is based on:

1. Heredity
2. Upbringing
3. Experience
4. Childhood

☐ None of the listed answers is correct

☐ 1, 2 and 4 only are correct

☐ 1, 2, 3 and 4 are correct

☒ 2, 3 and 4 only are correct
