
Online Examination Report

Date:	24.07.2014
Attempts:	1
Examinee:	Ojule, Benjamin
Date of birth:	
Subject:	040-Human performance
Result:	55 %
Time used:	00:30:00 (HH:MM:SS)

Attachments

1. List of result by question
2. List of result by topic
3. Detailed question result report

Attachment 1: List of result by question

CQB Number	Internal Number	Syllabus reference	Chapter	Points	Max. Points
1	206	40.	HUMAN PERFORMANCE	1,00	1,00
2	184	40.	HUMAN PERFORMANCE	0,00	1,00
3	170	40.	HUMAN PERFORMANCE	1,00	1,00
4	166	40.	HUMAN PERFORMANCE	0,00	1,00
5	162	40.	HUMAN PERFORMANCE	1,00	1,00
6	175	40.	HUMAN PERFORMANCE	0,00	1,00
7	78	40.1.3	Flight safety concepts	1,00	1,00
8	104	40.2	Basic aviation physiology and health maintenance	1,00	1,00
9	103	40.2	Basic aviation physiology and health maintenance	1,00	1,00
10	105	40.2	Basic aviation physiology and health maintenance	1,00	1,00
11	89	40.2.1.2	Respiratory and circulatory systems	0,00	1,00
12	70	40.2.1.2	Respiratory and circulatory systems	1,00	1,00
13	63	40.2.1.2	Respiratory and circulatory systems	1,00	1,00
14	34	40.2.1.2	Respiratory and circulatory systems	0,00	1,00
15	76	40.2.2.1	Central, peripheral and autonomic nervous system	1,00	1,00
16	13	40.2.2.2	Vision	0,00	1,00
17	36	40.2.2.2	Vision	1,00	1,00
18	22	40.2.2.4	Equilibrium	0,00	1,00
19	39	40.2.2.5	Integration of sensory inputs	1,00	1,00
20	30	40.2.3	Health and hygiene	0,00	1,00
21	93	40.2.3.2	Body rythm and sleep	0,00	1,00
22	43	40.2.3.3	Problem areas for pilots	1,00	1,00
23	17	40.2.3.4	Intoxication	1,00	1,00
24	122	40.3	BASIC AVIATION PSYCHOLOGY	0,00	1,00
25	101	40.3	BASIC AVIATION PSYCHOLOGY	0,00	1,00
26	97	40.3.1.1	Attention and vigilance	1,00	1,00
27	69	40.3.1.3	Memory	0,00	1,00
28	75	40.3.1.4	Response selection	1,00	1,00

CQB Number	Internal Number	Syllabus reference	Chapter	Points	Max. Points
29	111	40.3.3	Decision making	1,00	1,00
30	117	40.3.3	Decision making	1,00	1,00
31	109	40.3.3	Decision making	1,00	1,00
32	59	40.3.4.4	Communication	0,00	1,00
33	26	40.3.4.4	Communication	0,00	1,00
34	127	40.3.5	Human behaviour	0,00	1,00
35	112	40.3.5	Human behaviour	0,00	1,00
36	114	40.3.5	Human behaviour	0,00	1,00
37	116	40.3.5	Human behaviour	1,00	1,00
38	11	40.3.5.1	Personality, attitude and behaviour	1,00	1,00
39	1	40.3.5.1	Personality, attitude and behaviour	0,00	1,00
40	54	40.3.6.2	Stress	1,00	1,00
Total:55%				22,00	40,00

Attachment 2: List of result by topic

Licence

Date: 24.07.2014

Examinee: Ojule, Benjamin

Location: Uganda Civil Aviation Authority

Your Result: 22,00 from 40,00 Points (55,00 %)

Topics	Ammount of Questions	Points achieved	Maximum Points	Percent
40. HUMAN PERFORMANCE	40	22,00	40,00	55,00
40.1. Human Factors: basic concepts	1	1,00	1,00	100,00
40.2. Basic aviation physiology and health maintenance	16	10,00	16,00	62,50
40.3. BASIC AVIATION PSYCHOLOGY	17	8,00	17,00	47,06
Total	40	22,00	40,00	55,00

1

What action should be taken if hyperventilation is suspected?

- ☒ **Consciously breathe at a slower rate than normal.**
- ☐ **Breathe at a slower rate by taking very deep breaths.**
- ☐ **Consciously force yourself to take deep breaths and breathe at a faster rate than normal.**

2

What is the antidote for a pilot with a 'macho' attitude?

- ☒ Follow the rules. They are usually right.
- ☐ Taking chances is foolish.
- ☐ I'm not helpless. I can make a difference.

3

When should a flight instructor begin teaching aeronautical decision making (ADM) to a student?

- ☒ **As soon as the student is able to control the aircraft during basic maneuvers.**
- ☐ **Beginning with the first lesson.**
- ☐ **After the student has completed the initial solo flight but before conducting cross country flights.**

4

How can smoking affect a pilot?

- ☒ Reduces the oxygen-carrying capability of the blood.
- ☐ Creates additional carbon dioxide gases in the body which often leads to hyperventilation.
- ☒ Can decrease night vision by up to 50 percent.

5

What physical change would most likely occur to occupants of an unpressurized aircraft flying above 15,000 feet without supplemental oxygen?

- ☐ Gases trapped in the body contract and prevent nitrogen from escaping the bloodstream.
- ☒ A blue coloration of the lips and fingernails develop along with tunnel vision.
- ☐ The pressure in the middle ear becomes less than the atmospheric pressure in the cabin.

6

Examples of classic behavioral traps that experienced pilots may fall into are to

- ☒ **promote situational awareness and then necessary changes in behavior.**
- ☐ **assume additional responsibilities and assert PIC authority.**
- ☐ **complete a flight as planned, please passengers, meet schedules, and 'get the job done.'**

7

A pilot using a checklist is an example of the interaction within the SHELL Concept of:

☐ L and L

☐ L and E

☐ L and H

☒ L and S

8

Which of these would most likely result in hyperventilation?

- ☐ Insufficient oxygen.
- ☒ Insufficient carbon dioxide.
- ☐ Excessive carbon monoxide.

9

Which of these is a common symptom of hyperventilation?

- ☐ A sense of well-being.
- ☐ Decreased breathing rate.
- ☒ Drowsiness.

10

which of these conditions results in hypoxia?

- ☒ Insufficient oxygen reaching the brain.
- ☐ Excessive oxygen in the bloodstream.
- ☐ Excessive carbon dioxide in the bloodstream.

11

After SCUBA diving (more than 30 feet of depth) you have to wait a period of time before flying again. This period is at least:

☐ 6 hours

☐ 48 hours

☐ 24 hours

☒ 12 hours

12

Someone who has anaemia does not have

- ☐ enough platelets
- ☐ enough white blood cells
- ☒ enough functional haemoglobin
- ☐ enough plasma

13

When flying above 10.000 feet hypoxia arises because:

- ☒ partial oxygen pressure is below the critical value of 55mm/Hg
- ☐ composition of the air is different from sea level
- ☐ percentage of oxygen is lower than at sea level
- ☐ composition of the blood changes

14

Symptoms of decompression sickness

- ☐ are flatulence and pain in the middle ear
- ☐ are bends, chokes, creeps and neurological symptoms
- ☐ can only develop at altitudes of more than 40000 FT
- ☒ are only relevant when diving

15

A stereotype and involuntary reaction of the organism on stimulation of receptors is called:

☒ **reflex**

☐ **control system**

☐ **change of stimulation level**

☐ **data processing**

16

When focussing on near objects:

- ☒ the shape of lens gets flatter
- ☐ the pupil gets larger
- ☐ the shape of lens gets more spherical
- ☐ the cornea gets smaller

17

Presbyopia:

- ☒ is common over the age of 50.
- ☐ is partial visual loss due to pressure changes in the eye.
- ☐ surgical replacement of the lens the usual treatment and is compatible with flying.
- ☐ is caused by long-termed exposure to stimuli over 90dB.

18

Through which part of the ear does the equalization of pressure take place, when altitude is changed?

- ☒ Cochlea
- ☐ External auditory canal
- ☐ Tympanic membrane
- ☐ Eustachian tube

19

State the conditions which cause the "black hole effect" and the danger to flight safety.

- ☐ The "black hole effect" can be caused by flying over water at night on the approach to an airfield which can create the illusion that the aircraft is at a higher altitude than it is, leading to a high approach being flown.
- ☐ The "black hole effect" can be caused by flying over featureless terrain on the approach to an airfield which can create the illusion that the aircraft is at a higher altitude than it is, leading to a high approach being flown.
- ☒ The "black hole effect" can be caused by flying over water at night on the approach to an airfield which can create the illusion that the aircraft is at a higher altitude than it is, leading to a low approach being flown.
- ☐ The "black hole effect" can be caused by flying under instruments with poor cockpit lighting and can lead to disorientation.

20

The following can be observed when the internal body temperature falls below 35°C:

- ☒ mental disorders, and even coma
- ☐ the appearance of intense shivering
- ☐ shivering, will tend to cease, and be followed by the onset of apathy
- ☐ profuse sweating

21

which of the following best describes disturbance of the biological clock?

1. bad night's sleep
2. day flight Amsterdam - New York
3. day flight Amsterdam - Johannesburg
4. night flight New York - Amsterdam

☐ 1 and 3 are correct

☐ 1,2 and 3 are correct

☒ 2 and 4 are correct

☐ 1,2,3 and 4 are correct

22

Medical conditions such as high blood pressure, coronary problems and diabetes are associated with:

☐ anorexia nervosa

☐ hypoxia

☒ obesity

☐ cholera

23

Carbon monoxide (CO) poisoning in flight:

- ☐ is a complication when hyperventilating and requires its own special and individual treatment.
- ☒ presents an extremely dangerous situation as the blood may not be able carry sufficient amounts of oxygen to vital cells and tissues of the body.
- ☐ is usually harmless because oxygen is more easily attached to haemoglobin than carbon monoxide to a magnitude of 200 times.
- ☐ can be cured by breathing into a plastic bag to retain the carbon monoxide.

24

What does good cockpit stress management begin with?

- ☒ **Knowing what causes stress.**
- ☐ **Good life stress management.**
- ☐ **Eliminating life and cockpit stress issues.**

25

As hyperventilation progresses, a pilot can experience

- ☒ **heightened awareness and feeling of well being.**
- ☐ **decreased breathing rate and depth.**
- ☐ **symptoms of suffocation and drowsiness.**

26

Which of the following statements are correct?

1. The first information received determines how subsequent information will be evaluated.
2. If one has made up one's mind, contradictory information may not get the attention it really needs.
3. With increasing stress, attention is limited thereby reducing the flow of information to the central decision maker.

- ☐ 1 and 2 are correct
- ☐ 1 and 3 are correct
- ☒ 1, 2 and 3 are correct
- ☐ 2 and 3 are correct

27

Which of the following is true with reference to semantic memory?

- ☐ It is the meaning of words and general knowledge of the world; it lasts for a shorter period of time than episodic memory and tends to be less accurate.
- ☐ It is the memory of events; it lasts for a longer period of time than episodic memory and tends to be more accurate.
- ☐ It is the meaning of words and general knowledge of the world; it lasts for a longer period of time and tends to be more accurate than episodic memory.
- ☒ It is the memory of events; it lasts for a shorter period of time than episodic memory and tends to be less accurate.

28

Planning:

- ☐ is dangerous in the cockpit, as it interrupts flight crew creativity
- ☒ allows crew members to anticipate potential risky situations and decide on possible responses
- ☐ in the cockpit typically results in plans that are always easy to modify when things are not as anticipated
- ☐ is unnecessary in the cockpit, as crew members are so highly trained, they will always know what to do in unusual situations

29

Which of the following is considered as a step involved in good Aeronautical Decision Making (ADM) process?

- ☐ developing the 'right stuff' attitude.
- ☒ identifying personal attitudes hazardous to safe flight.
- ☐ making a rational evaluation of the required actions.

30

What are some of the hazardous attitudes dealt with in Aeronautical Decision Making (ADM)?

- ☐ Poor decision making, situational awareness, and judgment.
- ☐ Risk management, stress management, and risk elements.
- ☒ Antiauthority (don't tell me), impulsivity (do something quickly without thinking), macho (I can do it).

31

on which features does risk management, as part of the Aeronautical Decision Making (ADM) process, rely?

- ☐ The mental process of analyzing all information in a particular situation and making a timely decision on what action to take.
- ☒ Situational awareness, problem recognition, and good judgment.
- ☐ Application of stress management and risk element procedures.

32

"Stereotypes" are preconceptions or prejudices which can lead us to:

- ☒ **communicate non-verbally with a stranger.**
- ☐ **develop better teamwork by standardizing procedures.**
- ☐ **mis-judge individuals even if we have contact with them.**
- ☐ **act in the same manner in all situations and thus assuring stability.**

33

Which of the following are strategies for resolving conflict?

1. Seeking arbitration
2. Actively listening to other people
3. Recognise the early signs of conflict and address them
4. Becoming aware of cultural influences

☐ 1, 2, 3 and 4

☐ 2, 3, 4 only

☒ 1, 2, 4 only

☐ 1, 2, 3 only

34

When a pilot recognizes a hazardous thought, he or she then should correct it by applying the corresponding antidote. Which of the following is the antidote for ANTIAUTHORITY/DON'T TELL ME hazardous attitude?

- ☐ Not so fast. Think first.
- ☐ Don't tell me. Follow the rules. They are usually right.
- ☒ It won't happen to me. It could happen to me.

35

**Examples of classic behavioral traps that experienced pilots may fall into are:
trying to**

- ☒ **assume additional responsibilities and assert PIC authority.**
- ☐ **complete a flight as planned, please passengers, meet schedules, and demonstrate the 'right stuff.'**
- ☐ **promote situational awareness and then necessary changes in behavior.**

36

Some of these dangerous tendencies or behavior patterns which must be identified and eliminated include:

- ☐ Deficiencies in instrument skills and knowledge of aircraft systems or limitations.
- ☐ Peer pressure, get-there-it-is, loss of positional or situation awareness, and operating without adequate fuel reserves.
- ☒ Performance deficiencies from human factors such as, fatigue, illness or emotional problems.

37

Hazardous attitudes which contribute to poor pilot judgment can be effectively counteracted by

- ☒ redirecting that hazardous attitude so that appropriate action can be taken.
- ☐ taking meaningful steps to be more assertive with attitudes.
- ☐ early recognition of hazardous thoughts.

38

For a normal and healthy person, personality traits are:

☐ easy changed by an outside influence.

☒ stable.

☐ easy changeable.

☐ unstable.

39

Attitudes are defined as:

- ☒ the conditions necessary for carrying out an activity
- ☐ a synonym for behaviour
- ☐ the genetic predispositions for thinking and acting
- ☐ tendencies to respond to people, things or events in a particular manner

40

A person being exposed to extreme or prolonged stress factors can perceive:

- ☒ **distress**
- ☐ **eustress**
- ☐ **stressors**
- ☐ **coping stress**

Comment No.2 for question 27:

It is a lengthy question to read, think, understand and answer in the shortest time

Comment No.3 for question 21:

What does "follwoing" mean? Was it a miss spelling?
