Date: 18.07.2014

Examinee: Okeng, Japeth

Location: Uganda Civil Aviation Authority

Your Result: 28,00 from 40,00 Points (70,00 %)

Topics	Ammount of Questions	Points achieved	Maximum Points	Percent
40. HUMAN PERFORMANCE	40	28,00	40,00	70,00
40.2. Basic aviation physiology and health maintenance	13	10,00	13,00	76,92
40.3. BASIC AVIATION PSYCHOLOGY	15	11,00	15,00	73,33
Total	40	28,00	40,00	70,00

1

Which technique should a pilot use to scan for traffic to the right and left during straight-and-level flight?

- ☐ Concentrate on relative movement detected in the peripheral vision area.
- ☐ Systematically focus on different segments of the sky for short intervals.
- ☒ Continuous sweeping of the windshield from right to left.

2

One of the steps in the aeronautical decision making (ADM) process involved in good decision making is

- ☒ identifying personal attitudes hazardous to safe flight.
- ☐ developing a 'can do' attitude.
- ☐ making a rational evaluation of the required actions.

3

Name some hazardous attitudes that can affect your judgment during the aeronautical decision making (ADM) process.

☐ Impulsivity, antiestablishment, and reevaluation.

☐ Peer pressure and stress levels.

☒ Antiauthority, impulsivity, and resignation.

4

Which among these is a result of hyperventilation?

- ☐ a need to increase the flow of supplemental oxygen.
- ☐ breathing too rapidly causing a lack of oxygen.
- ☒ a lack of carbon dioxide in the body.

5

The DECIDE process consists of six elements to help provide a pilot a logical way of approaching aeronautical decision making. These elements are to

- ☐ estimate, determine, choose, identify, detect, and evaluate.
- ☐ detect, estimate, choose, identify, do, and evaluate.
- ☒ determine, evaluate, choose, identify, do, and eliminate.

6

The sensations which lead to spatial disorientation during instrument flight conditions

- ☐ are frequently encountered by beginning instrument pilots, but never by pilots with moderate instrument experience.
- ☒ must be suppressed and complete reliance placed on the indications of the flight instruments.
- ☐ occur, in most instances, during the initial period of transition from visual to instrument flight.

7

which of the following may more likely result into hypoxia?

- ☐ excessive nitrogen in the bloodstream.
- ☐ decreasing amount of oxygen as your altitude increases.
- ☒ reduced barometric pressures at altitude.

8

How can an instrument pilot best overcome spatial disorientation?

- ☒ Properly interpret the flight instruments and act accordingly.
- ☐ Use a very rapid cross-check.
- ☐ Avoid banking in excess of 30 degrees.

9

What is the antidote for a pilot with a 'macho' attitude?

☐ I'm not helpless. I can make a difference.

☐ Taking chances is foolish.

☒ Follow the rules. They are usually right.

10

How can smoking affect a pilot?

- ☐ Can decrease night vision by up to 50 percent.
- ☐ Creates additional carbon dioxide gases in the body which often leads to hyperventilation.
- ☒ Reduces the oxygen-carrying capability of the blood.

11

Abrupt head movement during a prolonged constant rate turn in IMC or simulated instrument conditions can cause

☐ **pilot disorientation.**

☒ **elevator illusion.**

☐ **false horizon.**

12

A sloping cloud formation, an obscured horizon, and a dark scene spread with ground lights and stars can create an illusion known as

☐ false horizons.

☒ autokinesis.

☐ elevator illusions.

13

Which of these would most likely result in hyperventilation?

- ☐ Insufficient oxygen.
- ☒ Insufficient carbon dioxide.
- ☐ Excessive carbon monoxide.

14

Hypoxia susceptibility due to inhalation of carbon monoxide increases as

- ☒ altitude increases.
- ☐ humidity decreases.
- ☐ oxygen demand increases.

15

Which of the following statements are correct:

- 1: SCUBA diving may be practiced without restriction
- 2: Many medicines have effects which are incompatible with flight safety
- 3: An adequate amount of fluid should be drunk when flying
- 4: Alcohol has no effect on the inner ear.

☐ 1, 2 and 3 are correct

☐ 1, 3 and 4 are correct

☐ 2 and 3 are correct

☒ 2, 3 and 4 are correct

16

Flying immediately following a dive with SCUBA diving equipment to a depth greater than 10 metres

- ☐ presents any dangers caused by DCS (decompression sickness) when climbing to altitudes not exceeding 30 000 FT
- ☐ will always lead to hypoxia
- ☒ can cause decompression sickness even when flying at pressure altitudes below 18 000 FT
- ☐ has no influence on altitude flights

17

The respiratory process consists mainly of

- ☐ the diffusion of oxygen through the respiratory membranes into the blood, transportation to the cells, diffusion into the cells and elimination of carbon dioxide from the body
- ☐ the transportation of oxygen to the cells and the elimination of nitrogen
- ☐ the transportation of carbon dioxide to the cells and elimination of oxygen
- ☒ the transportation of oxygen to the cells and the elimination of carbon monoxide

18

The ability of the human eye to read alphanumeric information is:

- ☐ almost equally shared by the entire retina
- ☐ limited to daytime using the rod cells
- ☒ limited to the foveal area of the retina
- ☐ governed by peripheral vision over an area of approximately 20 degrees of angle

19

Any prolonged exposure to noise in excess of 90 db can result in:

- ☐ conductive hearing loss
- ☐ a ruptured ear drum
- ☒ noise induced hearing loss
- ☐ presbycusis (effects of aging)

20

Which part of the inner ear is responsible for the perception of sound?

☐ The sacculus and utriculus

☐ The semicircular canals

☒ The cochlea

☐ The Eustachian tube

21

Through which part of the ear does the equalization of pressure take place, when altitude is changed?

- ☐ Tympanic membrane
- ☐ Cochlea
- ☒ Eustachian tube
- ☐ External auditory canal

22

Which of these is true regarding the presence of alcohol within the human body?

- ☐ A small amount of alcohol increases vision acuity.
- ☒ Judgment and decision-making abilities can be adversely affected by even small amounts of alcohol.
- ☐ An increase in altitude decreases the adverse effect of alcohol.

23

which of the following best describes disturbance of the biological clock?

1. bad night's sleep
2. day flight Amsterdam - New York
3. day flight Amsterdam - Johannesburg
4. night flight New York - Amsterdam

☐ 1,2,3 and 4 are correct

☒ 2 and 4 are correct

☐ 1 and 3 are correct

☐ 1,2 and 3 are correct

24

Which statement is correct?

1. Smokers have a greater chance of suffering from coronary heart disease
2. Smoking tobacco will raise the individuals physiological altitude during flight
3. Smokers have a greater chance of contracting lung cancer

☐ 1 and 2 are correct, 3 is false

☐ 2 and 3 are correct, 1 is false

☐ 1,2 and 3 are correct

☒ 1 and 3 are correct, 2 is false

25

Alcohol degrades:

- ☐ Stage 2 sleep
- ☐ Slow wave sleep
- ☒ Paradoxical sleep
- ☐ Stage 3 and 4 sleep

Candidate: Japeth Okeng
Date of birth: 1991-05-10

Subject: 040-Human performance
Date: 2014-07-18

26

What are two types of attention ?

☐ Intuitive and behavioural

☐ Cognitive and intuitive

☒ Selective and divided

☐ Divided and behavioural

27

While conducting an operational check of the cabin pressurization system, the pilot discovers that the rate control feature is inoperative. He knows that he can manually control the cabin pressure, so he elects to disregard the discrepancy. Which of the following alternatives best illustrates the INVULNERABILITY reaction?

- ☐ He can handle a little problem like this.
- ☒ What is the worst that could happen.
- ☐ It's too late to fix it now.

28

To communicate effectively, instructors must

- ☐ utilize highly organized notes.
- ☒ display a positive, confident attitude.
- ☐ display an authoritarian attitude.

29

While material is being taught, students may be learning other things as well. What is the additional learning called?

☒ Incidental learning.

☐ Conceptual learning.

☐ Residual learning.

30

Planning:

- ☒ allows crew members to anticipate potential risky situations and decide on possible responses
- ☐ in the cockpit typically results in plans that are always easy to modify when things are not as anticipated
- ☐ is dangerous in the cockpit, as it interrupts flight crew creativity
- ☐ is unnecessary in the cockpit, as crew members are so highly trained, they will always know what to do in unusual situations

31

Which of the following is considered as a step involved in good Aeronautical Decision Making (ADM) process?

- ☐ making a rational evaluation of the required actions.
- ☒ identifying personal attitudes hazardous to safe flight.
- ☐ developing the 'right stuff' attitude.

32

on which features does risk management, as part of the Aeronautical Decision Making (ADM) process, rely?

- ☐ The mental process of analyzing all information in a particular situation and making a timely decision on what action to take.
- ☒ Situational awareness, problem recognition, and good judgment.
- ☐ Application of stress management and risk element procedures.

33

Judgement is based upon:

- ☒ **a process involving a pilot's attitude to take and to evaluate risks by assessing the situation and making decisions based upon knowledge, skill and experience**
- ☐ **the development of skills through constant practice of flight manoeuvres**
- ☐ **the ability to interpret the flight instruments**
- ☐ **a decision-making process involving the 5 physical senses and their use to manually operate the aircraft controls**

34

With regard to the practice of English, which of the following statements is correct?

- ☐ It is necessary and sufficient to have a command of any of the official languages of the ICAO.
- ☐ Be familiar with normal procedures in English since only this allows for effective management of any flight's communication.
- ☒ All pilots should have a sound understanding of English because it is safer to adhere to the common language chosen by the aeronautical world.
- ☐ The composition of every crew should be geared to a command of the official aeronautical language of the destination country.

35

"Stereotypes" are preconceptions or prejudices which can lead us to:

- ☒ **act in the same manner in all situations and thus assuring stability.**
- ☐ **mis-judge individuals even if we have contact with them.**
- ☐ **communicate non-verbally with a stranger.**
- ☐ **develop better teamwork by standardizing procedures.**

36

What should a pilot do when recognizing a thought as hazardous?

☐ Develop this hazardous thought and follow through with modified action.

☒ Avoid developing this hazardous thought.

☐ Label that thought as hazardous, then correct that thought by stating the corresponding learned antidote.

37

The passengers for a charter flight have arrived almost an hour late for a flight that requires a reservation. Which of the following alternatives best illustrates the ANTIAUTHORITY reaction?

- ☒ Those reservation rules do not apply to this flight.
- ☐ The pilot can't help it that the passengers are late.
- ☐ If the pilot hurries, he or she may still make it on time.

38

What is the first step in neutralizing a hazardous attitude in the ADM process?

☐ Recognition of invulnerability in the situation.

☒ Recognition of hazardous thoughts.

☐ Dealing with improper judgment.

39

Personality is based on:

1. Heredity
2. Upbringing
3. Experience
4. Childhood

☐ 2, 3 and 4 only are correct

☐ 1, 2, 3 and 4 are correct

☒ None of the listed answers is correct

☐ 1, 2 and 4 only are correct

40

An identical situation can be experienced by one pilot as exciting in a positive sense and by another pilot as threatening. In both cases:

- ☐ both pilots will loose their motor-coordination
- ☐ the pilot feeling threatened, will be much more relaxed, than the pilot looking forward to what may happen
- ☒ the arousal level of both pilots will be raised
- ☒ both pilots will experience the same amount of stress
