Examinee: Eguny 2, Robert

Location: Uganda Civil Aviation Authority

Your Result: 0,00 from 40,00 Points (0,00 %)

Topics	Amount of Questions	Points achieved	Maximum Points	Percent
40. HUMAN PERFORMANCE	40	0,00	40,00	0,00
40.1. Human Factors: basic concepts	1	0,00	1,00	0,00
40.2. Basic aviation physiology and health maintenance	13	0,00	13,00	0,00
40.3. BASIC AVIATION PSYCHOLOGY	14	0,00	14,00	0,00
Total	40	0,00	40,00	0,00

1

How can an instrument pilot best overcome spatial disorientation?

- ☐ Use a very rapid cross-check.
- ☐ Avoid banking in excess of 30 degrees.
- ☒ Properly interpret the flight instruments and act accordingly.

2

An abrupt change from climb to straight-and-level flight can create the illusion of

- ☐ a noseup attitude.
- ☐ a descent with the wings level.
- ☒ tumbling backwards.

3

A pilot is more subject to spatial disorientation if

- ☒ **body signals are used to interpret flight attitude.**
- ☐ **eyes are moved often in the process of cross-checking the flight instruments.**
- ☐ **kinesthetic senses are ignored.**

4

When should a flight instructor begin teaching aeronautical decision making (ADM) to a student?

- ☒ **As soon as the student is able to control the aircraft during basic maneuvers.**
- ☐ **Beginning with the first lesson.**
- ☐ **After the student has completed the initial solo flight but before conducting cross country flights.**

5

Without visual aid, a pilot often interprets centrifugal force as a sensation of

☐ turning.

☐ motion reversal.

☒ rising or falling.

6

A sloping cloud formation, an obscured horizon, and a dark scene spread with ground lights and stars can create an illusion known as

- ☐ autokinesis.
- ☐ elevator illusions.
- ☒ false horizons.

7

some of the hazardous attitudes which may occur to every pilot to some degree at some time are....

- ☐ Poor risk management and lack of stress management.
- ☐ Poor situational awareness, snap judgments, and lack of a decision making process.
- ☒ Antiauthority, impulsivity, macho, resignation, and invulnerability.

8

Which procedure is recommended to prevent or overcome spatial disorientation?

☐ Reduce head and eye movements to the extent possible.

☒ Rely on the indications of the flight instruments.

☐ Rely on the kinesthetic sense.

9

What visual illusion creates the same effect as a narrower-than-usual runway?

- ☐ A downsloping runway.
- ☐ A wider-than-usual runway.
- ☒ An upsloping runway.

10

During a stall recovery, the instructor allows the student to exceed maneuvering speed.
Which best illustrates an 'antiauthority' reaction by the instructor?

- ☒ The aircraft can handle a lot more than the maneuvering speed.
- ☐ The student should know how to recover from a stall by this time.
- ☐ There hasn't been a problem doing this in the past.

11

Motion sickness is caused by

- ☒ continued stimulation of the tiny portion of the inner ear which controls sense of balance.
- ☐ the movement of an aircraft causing the stomach to create an acid substance which causes the stomach lining to contract.
- ☐ an instability in the brain cells which affects balance and will generally be overcome with experience.

12

The DECIDE process consists of six elements to help provide a pilot a logical way of approaching aeronautical decision making. These elements are to

- ☐ estimate, determine, choose, identify, detect, and evaluate.
- ☒ detect, estimate, choose, identify, do, and evaluate.
- ☐ determine, evaluate, choose, identify, do, and eliminate.

13

A pilot using a checklist is an example of the interaction within the SHELL Concept of:

☐ L and L

☐ L and E

☐ L and H

☒ L and S

14

Which gas below 70,000 ft., above ground gas makes up the major part of the atmosphere ?

☐ Ozone

☒ Nitrogen

☐ Carbon dioxide

☐ Oxygen

15

Hypoxia is:

- ☐ a condition of lacking oxygen in the brain causing the circulatory system to compensate by decreasing the heart rate.
- ☐ a physical condition caused by a lack of oxygen saturation in the blood while hyperventilating.
- ☒ a physical condition caused by a lack of oxygen to meet the needs of the body tissues, leading to mental and muscular disturbances
- ☐ often produced during steep turns when pilots turn their heads in a direction opposite to the direction in which the aircraft is turning

16

The respiratory process consists mainly of

- ☐ the transportation of carbon dioxide to the cells and elimination of oxygen
- ☒ the diffusion of oxygen through the respiratory membranes into the blood, transportation to the cells, diffusion into the cells and elimination of carbon dioxide from the body
- ☐ the transportation of oxygen to the cells and the elimination of nitrogen
- ☐ the transportation of oxygen to the cells and the elimination of carbon monoxide

17

When faced with sustained cold temperature, how does the body resist this physical stress?

- ☐ By speeding up the metabolic rate in the Autonomic Nervous System.
- ☐ By vasodilatation which permits a greater flow of blood to the periphery.
- ☒ By intense vasoconstriction.
- ☐ By increasing cardiac frequency.

18

Flying immediately following a dive with SCUBA diving equipment to a depth greater than 10 metres

- ☒ **can cause decompression sickness even when flying at pressure altitudes below 18 000 FT**
- ☐ **has no influence on altitude flights**
- ☐ **will always lead to hypoxia**
- ☐ **presents any dangers caused by DCS (decompression sickness) when climbing to altitudes not exceeding 30 000 FT**

19

When suffering from Hypoxia short-term memory impairment starts at approximately

☐ 10,000 ft

☐ 25,000 ft

☐ 18,000 ft

☒ 12,000 ft

20

Presbyopia:

- ☒ is common over the age of 50.
- ☐ is partial visual loss due to pressure changes in the eye.
- ☐ surgical replacement of the lens the usual treatment and is compatible with flying.
- ☐ is caused by long-termed exposure to stimuli over 90dB.

21

During poor weather conditions a pilot should fly with reference to instruments because:

- ☐ pressure differences can cause the altimeter to give wrong information
- ☒ perception of distance and speed is difficult in an environment of low contrast
- ☐ the danger of a "greying out" will make it impossible to determine the height above the terrain
- ☐ his attention will be distracted automatically under these conditions

22

Noise induced hearing loss:

- ☐ causes Eustationary Tube dysfunction.
- ☒ is a condition resulting in permanent hearing loss of selected frequencies.
- ☐ is also known as presbyacosis and is associated with pressure damage to the middle ear.
- ☐ is not a permanent hearing loss, the nerve cells frequently recover.

23

Which part of the inner ear is responsible for the perception of sound?

- ☐ The semicircular canals
- ☐ The Eustachian tube
- ☐ The sacculus and utriculus
- ☒ The cochlea

24

The following can be observed when the internal body temperature falls below 35°C:

- ☐ mental disorders, and even coma
- ☐ the appearance of intense shivering
- ☒ shivering, will tend to cease, and be followed by the onset of apathy
- ☐ profuse sweating

25

Flying with a "common cold":

- ☐ increases the risk of hypertension.
- ☒ may lead to incapacitation due to severe sinus or ear pain.
- ☐ will cause infection in other crew members if you are flying in a pressurised aircraft.
- ☐ is permitted as long as you are on treatment with antibiotics.

26

To prevent gastro-intestinal problems in tropical climates you should:

1. eat salad or raw vegetables
2. peel fruit when necessary
3. eat food that has been properly cooked
4. avoid ice-cream

Which of the following lists all the correct answers?

☐ 1, 2 and 3

☐ 1 and 2

☒ 1, 2, 3 and 4

☐ 2 and 4

27

To communicate effectively, instructors must

- ☐ display an authoritarian attitude.
- ☒ display a positive, confident attitude.
- ☐ utilize highly organized notes.

28

Carbon Monoxide is particularly dangerous because:

1. Its initial symptoms are not alarming
2. It is colourless
3. Its is odourless
4. It is highly toxic
5. Its effects are cumulative

☐ 1, 2, 3 and 5 only

☐ 2, 3, 4 and 5 only

☐ 2, 3, and 4 only

☒ all of the above

29

What are two types of attention ?

- ☒ **Selective and divided**
- ☐ **Divided and behavioural**
- ☐ **Cognitive and intuitive**
- ☐ **Intuitive and behavioural**

30

While material is being taught, students may be learning other things as well. What is the additional learning called?

☐ Conceptual learning.

☐ Residual learning.

☒ Incidental learning.

31

Which of the following statements are correct?

1. The first information received determines how subsequent information will be evaluated.
2. If one has made up one's mind, contradictory information may not get the attention it really needs.
3. With increasing stress, attention is limited thereby reducing the flow of information to the central decision maker.

- ☐ 1 and 2 are correct
- ☐ 1 and 3 are correct
- ☒ 1, 2 and 3 are correct
- ☐ 2 and 3 are correct

32

The ability to monitor information which could indicate the development of a critical situation

- ☒ **is necessary to maintain good situational awareness**
- ☐ **makes no sense because the human information processing system is limited anyway**
- ☐ **is responsible for the development of inadequate mental models of the real world**
- ☐ **is dangerous, because it distracts attention from flying the aircraft**

33

What are some of the hazardous attitudes dealt with in Aeronautical Decision Making (ADM)?

- ☐ Poor decision making, situational awareness, and judgment.
- ☐ Risk management, stress management, and risk elements.
- ☒ Antiauthority (don't tell me), impulsivity (do something quickly without thinking), macho (I can do it).

34

Which of the following statements best characterises a self-centered cockpit ?

- ☐ The egoistic and self-centered personality of the captain often leads to a synergetic cockpit
- ☐ While decreasing communication, the independence of each member bolsters the crew's synergy
- ☐ The communication between crew members always increases when the captain takes charge of a situation
- ☒ Each one does his own thing while at the same time assuming that everyone is aware of what is being done or what is going on

35

With regard to the practice of English, which of the following statements is correct?

- ☐ Be familiar with normal procedures in English since only this allows for effective management of any flight's communication.
- ☐ The composition of every crew should be geared to a command of the official aeronautical language of the destination country.
- ☐ It is necessary and sufficient to have a command of any of the official languages of the ICAO.
- ☒ All pilots should have a sound understanding of English because it is safer to adhere to the common language chosen by the aeronautical world.

36

Hazardous attitudes which contribute to poor pilot judgment can be effectively counteracted by

- ☒ redirecting that hazardous attitude so that appropriate action can be taken.
- ☐ taking meaningful steps to be more assertive with attitudes.
- ☐ early recognition of hazardous thoughts.

37

Some of these dangerous tendencies or behavior patterns which must be identified and eliminated include:

- ☐ Deficiencies in instrument skills and knowledge of aircraft systems or limitations.
- ☒ Peer pressure, get-there-it-is, loss of positional or situation awareness, and operating without adequate fuel reserves.
- ☐ Performance deficiencies from human factors such as, fatigue, illness or emotional problems.

38

The passengers for a charter flight have arrived almost an hour late for a flight that requires a reservation. Which of the following alternatives best illustrates the ANTIAUTHORITY reaction?

- ☒ Those reservation rules do not apply to this flight.
- ☐ The pilot can't help it that the passengers are late.
- ☐ If the pilot hurries, he or she may still make it on time.

39

Which of the following elements make up the personality of an individual?

1. Heredity
2. Childhood environment
3. Upbringing
4. Past experience

☒ 1,2,3,4

☐ 2,3

☐ 2,3,4

☐ 1,2,4

40

Anxiety can affect:

- 1. Judgement**
- 2. Attention**
- 3. Memory**
- 4. Concentration**

☐ 1 and 2 only are correct

☒ All are correct

☐ 1, 2 and 4 only are correct

☐ 1 only is correct
