Date: 17.07.2014

Examinee: Ekwee, Simon 2

Location: Uganda Civil Aviation Authority

Your Result: 26,00 from 40,00 Points (65,00 %)

Topics	Ammount of Questions	Points achieved	Maximum Points	Percent
40. HUMAN PERFORMANCE	40	26,00	40,00	65,00
40.2. Basic aviation physiology and health maintenance	17	14,00	17,00	82,35
40.3. BASIC AVIATION PSYCHOLOGY	7	3,00	7,00	42,86
Total	40	26,00	40,00	65,00

1

Which among these is a result of hyperventilation?

- ☐ breathing too rapidly causing a lack of oxygen.
- ☐ a need to increase the flow of supplemental oxygen.
- ☒ a lack of carbon dioxide in the body.

2

A sloping cloud formation, an obscured horizon, and a dark scene spread with ground lights and stars can create an illusion known as

- ☒ **autokinesis.**
- ☐ **elevator illusions.**
- ☐ **false horizons.**

3

Which of the following is the final step of the Decide Model for effective risk management and Aeronautical Decision Making?

☐ Eliminate.

☐ Evaluate.

☒ Estimate.

4

What is the antidote for a pilot with a 'macho' attitude?

- ☒ Follow the rules. They are usually right.
- ☐ Taking chances is foolish.
- ☐ I'm not helpless. I can make a difference.

5

Due to visual illusion, when landing on a narrower-than-usual runway, the aircraft will appear to be

- ☒ higher than actual, leading to a lower-than-normal approach.
- ☐ higher than actual, leading to a higher-than-normal approach.
- ☐ lower than actual, leading to a higher-than-normal approach.

6

To help manage cockpit stress, a pilot should

- ☐ avoid situations that will degrade the ability to handle cockpit responsibilities.
- ☐ try to relax and think rationally at the first sign of stress.
- ☒ think of life stress situations that are similar to those in flying.

7

The most effective technique to use for detecting other aircraft at night is to

- ☐ turn the head and sweep the eyes rapidly over the entire visible region.
- ☐ avoid scanning the region below the horizon so as to avoid the effect of ground lights on the eyes.
- ☒ avoid staring directly at the point where another aircraft is suspected to be flying.

8

When should a flight instructor begin teaching aeronautical decision making (ADM) to a student?

- ☒ **As soon as the student is able to control the aircraft during basic maneuvers.**
- ☐ **Beginning with the first lesson.**
- ☐ **After the student has completed the initial solo flight but before conducting cross country flights.**

9

The DECIDE process consists of six elements to help provide a pilot a logical way of approaching aeronautical decision making. These elements are to

- ☒ estimate, determine, choose, identify, detect, and evaluate.
- ☐ detect, estimate, choose, identify, do, and evaluate.
- ☐ determine, evaluate, choose, identify, do, and eliminate.

10

A person should be able to overcome the symptoms of hyperventilation by

- ☒ **slowing the breathing rate**
- ☐ **increasing the breathing rate**
- ☐ **refraining from the use of alcohol**

11

What action should be taken if hyperventilation is suspected?

- ☒ **Consciously breathe at a slower rate than normal.**
- ☐ **Breathe at a slower rate by taking very deep breaths.**
- ☐ **Consciously force yourself to take deep breaths and breathe at a faster rate than normal.**

12

Why is hypoxia particularly dangerous during flights with one pilot?

- ☐ The pilot may not be able to control the aircraft even if using oxygen.
- ☒ Symptoms of hypoxia may be difficult to recognize before the pilot's reactions are affected.
- ☐ Night vision may be so impaired that the pilot cannot see other aircraft.

13

In order to gain a realistic perspective on one's attitude toward flying, a pilot should

- ☐ obtain both realistic and thorough flight instruction during training.
- ☒ understand the need to complete the flight.
- ☐ take a Self-Assessment Hazardous Attitude Inventory Test.

14

**During a stall recovery, the instructor allows the student to exceed maneuvering speed.
Which best illustrates an 'antiauthority' reaction by the instructor?**

- ☒ The aircraft can handle a lot more than the maneuvering speed.
- ☐ The student should know how to recover from a stall by this time.
- ☒ There hasn't been a problem doing this in the past.

15

What suggestion could you make to people who are experiencing motion sickness?

- ☒ Avoid unnecessary head movement and focus sight on a point outside the aircraft.
- ☐ Have the students lower their head, shut their eyes, and take deep breaths.
- ☐ Recommend taking medication to prevent motion sickness.

16

A rapid acceleration during takeoff can create the illusion of

☐ spinning in the opposite direction.

☐ diving into the ground.

☒ being in a noseup attitude.

17

Hypoxia susceptibility due to inhalation of carbon monoxide increases as

- ☐ humidity decreases.
- ☐ oxygen demand increases.
- ☒ altitude increases.

18

Which of these is a common symptom of hyperventilation?

- ☐ A sense of well-being.
- ☐ Decreased breathing rate.
- ☒ Drowsiness.

19

which of these conditions results in hypoxia?

- ☒ Insufficient oxygen reaching the brain.
- ☐ Excessive oxygen in the bloodstream.
- ☐ Excessive carbon dioxide in the bloodstream.

20

When exhaling, the expired air contains:

- ☐ less water vapour than in the inhaled air
- ☒ more nitrogen than in the inhaled air
- ☐ more carbon dioxide than in the inhaled air
- ☐ more oxygen than in the inhaled air

21

The total gas volume of the lung is the sum of:

1. tidal volume
2. inspiratory reserve volume
3. expiratory reserve volume
4. residual volume

Which of the following lists the correct combination?

- ☐ 1 and 2
- ☐ 1, 2 and 3
- ☐ 2 and 3
- ☒ 1, 2, 3 and 4

22

Flying a non-pressurized light aircraft at 9 000 feet your passenger develops blue lips:

- ☐ you supply additional oxygen but controlled.
- ☐ you supply him/her with extra oxygen, but do not reduce altitude .
- ☒ you reduce altitude and supply him/her with oxygen.
- ☐ calm him/her and occupy him with suitable tasks.

23

Hypoxia can be caused by

- ☐ too much carbon dioxide in the blood
- ☐ lack of nitrogen in ambient air
- ☒ decreased ability of the haemoglobin to transport oxygen
- ☐ increasing oxygen partial pressure used for the exchange of gases

24

The retina of the eye

- ☐ only regulates the light that falls into the eye
- ☒ is the light-sensitive inner lining of the eye containing the photoreceptors essential for vision
- ☐ is the muscle, changing the size of the crystalline lens
- ☐ filters the UV-light

25

Illuminated anti-collision lights in IMC

- ☐ will improve the pilots depth perception
- ☐ can cause colour-illusions
- ☒ can cause disorientation
- ☐ will effect the pilots binocular vision

26

Which of the following statements is correct?

- ☐ Scotopic Vision is vision through the operation of the Cones.
- ☐ Photopic Vision is the same as Peripheral Vision.
- ☒ Scotopic Vision is vision through the operation of the Rods.
- ☐ Scotopic Vision is the same as Photopic Vision.

27

Which of these is true regarding the presence of alcohol within the human body?

- ☐ An increase in altitude decreases the adverse effect of alcohol.
- ☒ Judgment and decision-making abilities can be adversely affected by even small amounts of alcohol.
- ☐ A small amount of alcohol increases vision acuity.

28

The following can be observed when the internal body temperature falls below 35°C:

- ☐ mental disorders, and even coma
- ☐ the appearance of intense shivering
- ☒ shivering, will tend to cease, and be followed by the onset of apathy
- ☐ profuse sweating

29

which of the following best describes disturbance of the biological clock?

1. bad night's sleep
2. day flight Amsterdam - New York
3. day flight Amsterdam - Johannesburg
4. night flight New York - Amsterdam

☐ 1 and 3 are correct

☒ 1,2 and 3 are correct

☐ 2 and 4 are correct

☐ 1,2,3 and 4 are correct

30

Medical conditions such as high blood pressure, coronary problems and diabetes are associated with:

☐ anorexia nervosa

☒ hypoxia

☐ obesity

☐ cholera

31

Alcohol, when taken simultaneously with drugs, may

- ☐ compensate for side effects of drugs
- ☐ increase the rate of drug elimination from the blood
- ☒ intensify the side effects of the drugs
- ☐ lead to undesired effects only during night flights

32

Which statement is correct?

1. Smokers have a greater chance of suffering from coronary heart disease
2. Smoking tobacco will raise the individuals physiological altitude during flight
3. Smokers have a greater chance of contracting lung cancer

- ☒ 1,2 and 3 are correct
- ☐ 1 and 3 are correct, 2 is false
- ☐ 2 and 3 are correct, 1 is false
- ☐ 1 and 2 are correct, 3 is false

33

Carbon monoxide (CO) poisoning in flight:

- ☐ is a complication when hyperventilating and requires its own special and individual treatment.
- ☒ presents an extremely dangerous situation as the blood may not be able carry sufficient amounts of oxygen to vital cells and tissues of the body.
- ☐ is usually harmless because oxygen is more easily attached to haemoglobin than carbon monoxide to a magnitude of 200 times.
- ☐ can be cured by breathing into a plastic bag to retain the carbon monoxide.

34

To communicate effectively, instructors must

- ☐ display an authoritarian attitude.
- ☒ display a positive, confident attitude.
- ☐ utilize highly organized notes.

35

Information stays in the short-term memory

- ☐ about 20 seconds
- ☒ from 5 to 10 minutes
- ☐ around 24 hours
- ☐ less than 1 second

36

Define Aeronautical Decision Making(ADM)

- ☐ decision making process which relies on good judgment to reduce risks associated with each flight.
- ☒ systematic approach to the mental process used by pilots to consistently determine the best course of action for a given set of circumstances.
- ☐ mental process of analyzing all information in a particular situation and making a timely decision on what action to take.

37

on which features does risk management, as part of the Aeronautical Decision Making (ADM) process, rely?

- ☐ The mental process of analyzing all information in a particular situation and making a timely decision on what action to take.
- ☒ Situational awareness, problem recognition, and good judgment.
- ☐ Application of stress management and risk element procedures.

38

The passengers for a charter flight have arrived almost an hour late for a flight that requires a reservation. Which of the following alternatives best illustrates the ANTIAUTHORITY reaction?

- ☐ Those reservation rules do not apply to this flight.
- ☐ The pilot can't help it that the passengers are late.
- ☒ If the pilot hurries, he or she may still make it on time.

39

Which of the following elements make up the personality of an individual?

1. Heredity
2. Childhood environment
3. Upbringing
4. Past experience

☐ 1,2,3,4

☐ 2,3

☐ 2,3,4

☒ 1,2,4

40

Attitudes are defined as:

- ☐ the conditions necessary for carrying out an activity
- ☒ a synonym for behaviour
- ☐ the genetic predispositions for thinking and acting
- ☐ tendencies to respond to people, things or events in a particular manner
